Powerful Technology That Will Significantly Increase your Bottom Line!

**Advanced PCO Technology -
Air and Surface Decontamination from Phocatox Technologies.**

Thank you for the opportunity to introduce and share pertinent information on the BioSweep 700 high performance air and surface decontamination system, **and the EnviroSharp licensee business opportunity.**

Our organisation is the EU licensee of BioSweep systems.

The Phocatox Technologies innovative **biodecontamination technology** is based on advanced **photocatalytic oxidation (PCO)** to **destroy airborne and surface contaminants** within indoor environments. These contaminants include **airborne viruses, bacteria, fungi, fine particulate matter such as aerosols, smoke, fumes, dust, ash and pollen, and volatile organic compounds.**

A Cost Effective Solution:

Introductory £4795 MSRP plus VAT and carriage per unit.

1 day BioSweep certification course is included in the price.

Individual units available for sale to restoration contractors.

Exclusive BioSweep Service Territories are available in the UK and the EU.
